Daniel Devátý

AI DEVELOPER · APPS, WEB AND SERVERS

info@dandev.cz
dandev.cz
Prague, Czechia

I design and build mobile apps, business systems and AI automations – from the idea through design and backend to release. I love building with AI agents and giving them their own tools.

Experience

Developer · Filipa a.s. 9/2026 – present

Berta, the internal system for production, shifts and warehouse (Django, React): capacity planner, milestones, scan-based receiving, warehouse maps. The whole Berta HQ iOS app for management (SwiftUI). Security audit and fixes, server deployments.

Developer · Stocked s.r.o. 5/2026 – present

Logisimo, a parcel shipping platform: TopTrans, FedEx, DHL and UPS integrations, app redesign, Czech/English translations. Scanner in the STOCKISIMO warehouse app (Flutter).

My own products

ScanKit · scankit.cz

Reading dozens of codes at once, an alternative to Scandit: library (WebAssembly, Apple Vision, ML Kit), iOS and Android app and a sales website.

Questy · questy.dandev.cz

Challenges for groups of friends. Expo, self-hosted Supabase on a Raspberry Pi, Realtime, photo proofs.

NoMap

Streets you walk soak into the map. MapLibre, background location, city coverage from OpenStreetMap.

ManHunt

GPS game for 4–30 players, 6 modes, end-to-end encryption, own relay server and maps.

Mňam and Vstříc

Budget dinner planner (RevenueCat, Maestro E2E) and a race to meet halfway (PostGIS, push notifications).

Personal dashboard

Next.js and Postgres with my own MCP server for Claude.

Homelab

My own Raspberry Pi server (Docker, Caddy, Cloudflare Tunnel) running ManHunt, the Questy backend and dandev.cz.

Education

SPŠE a Gymnázium V Úžlabině, Prague

Information technology

graduating 2027

Skills

AI
Claude API, MCP, voice agents, RAG

Mobile
React Native, Expo, SwiftUI, Flutter

Backend
Supabase, Postgres, Django, Node, Go, Python

Ops
Docker, Linux, Raspberry Pi, Caddy, Cloudflare, Azure

Outside code

Enduro mountain biking, climbing
